

Tathya

Data and Document
Centric Services

We Mean Information, Literally

Indexing and Coding:

- **Accurate capture of Data Elements through Double Entry system to eliminate typing errors completely.**
- **XML Tagging or conversion into any of the standard electronic formats like .csv, .xls, .dbf, .mdb etc.**
- **Continuous Sampling Plan (CSP) based process quality control.**
- **Outgoing Quality assurances using BS-6000 plans.**
- **Experience in Litigation Coding, Logical Document Determination, simple to complex data element extraction from scanned images for various industry segments.**

Post Press Services:

- **OCR/ICR based captures and manual cleaning.**
- **XML and/or HTML Tagging.**
- **Conversion into editable electronic formats like Word .doc.**
- **Comprehensive format conversions like pdf to html or .doc etc.**

Redacting Services:

- Redacting is the process of obliterating sensitive information within scanned images so as to make it impossible to read the sensitive information while keeping the remaining document readable.
- Typically requires 100% accuracy as a single 'non-redaction' renders the whole effort fruitless.
- Image analysis and double entry based software to ensure 'zero' error levels.
